Embroidery guidelines
-Colorsystem have 220 colors, each in average 10 PMS. exact pms not possible.
-To provide best match, please mention PMS-colors if available (do not attempt converting on internet from CMYK if not)
-Always make sure all text is outlined
-Fine embroidery apply if there is big area fully embroidered, necessary also if small details.
-Standard apply if there is only text or a combination of text and logo where the embroideried area is less than 60%.
-We reserve the right to decide fine or standard based on logo. this is not a cost issue, if the area of full embroidery is too big, the marking can get so stiff it will break the embroidery needle by generating too much force in the jig.
