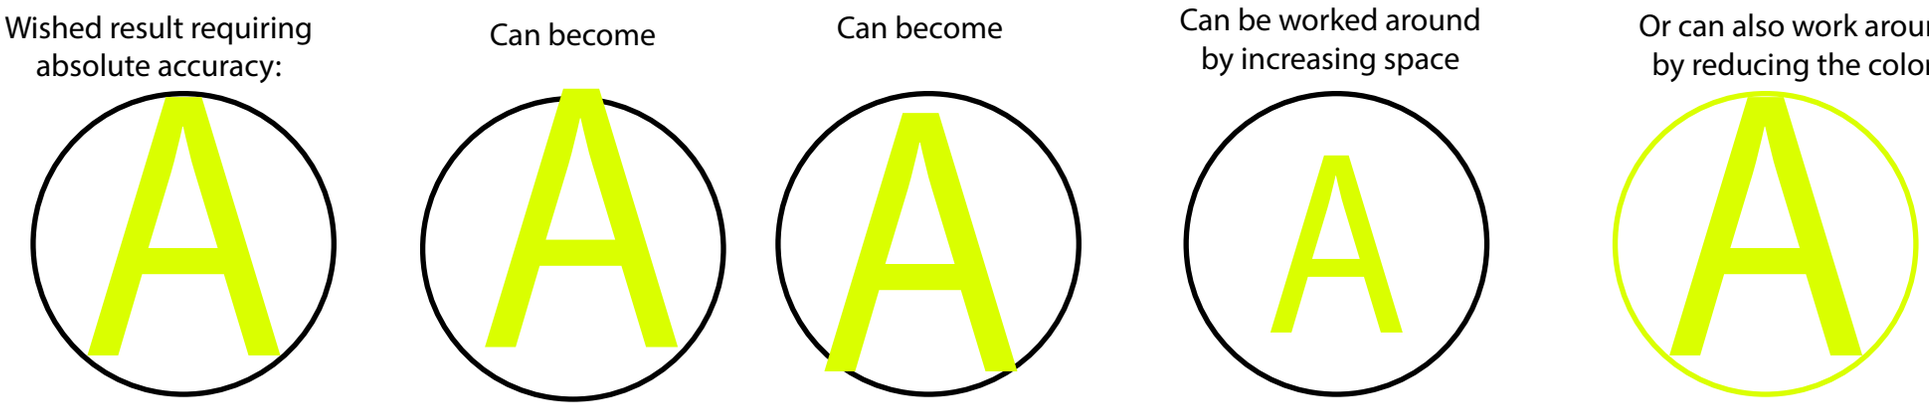
RSPEN

Marking: Pad-print 1-4 colors

Design comments:
-No gradients , colors are solid
-Remember to outline all fonts always
-Letters should be 1mm high for readability, 1.5mm for good readability.
-"absolute accuracy" is not acheivable, Deviation can be 0.5mm between colors as product is moved mechanically between color stations.
In other words: Where deviation in placement of color, even less than 0.5 mm will break the visual appearance of the logo then the logo is not producable.



Place logo inside pink line, 4*1 cm
